High precision and performance
due to purely electric drive
without motion latency

Large working range
up to DN250 / 9" completely
without adapter (compliant
with oval plaster openings)

Technical highlights

- » Quick commissioning and easy handling through **user-friendly design**
- » **Wireless control up to 100 m / 330 ft.** in open field for comfortable working from e.g. the car, a weather-protected position, etc.
- » Fully electric supply **with high milling performance and highest precision**
- » **Milling at 90° bendability** from DN150 / 6"
- » **Full-HD live video with recording** as well as high resolution photos
- » **Live logging during work** by means of „HD videos & photos“ incl. text documentation for appraisers, GC or customer
- » **Infinite feed*** and very smooth movement (with cruise control) *optional in long robot version
- » **3x 400° rotation** for optimal coverage
- » **Quickly replaceable** wear parts

Modular system

All robots and attachments can be used with the same supply unit

Arc capable
87° bends from DN150 / 6"
45° bends from DN125 / 4"

Wireless control

Work wirelessly from the car or a protected place

100% electric
Supply by standard household socket 110VAC/230VAC (cable reel integrated)
